How to grant permissions for User defined type in Oracle I think you need to either qualify type with schema when using client account (CO_ADMIN). how to make a user have complete access to all tables of another schema and discussions on schema owners and application users oracle concept. Here we are granting select, insert, update, delete, execute privileges to appuser1, you can.

You can do it in a loop and grant by dynamic SQL:

```
BEGIN
  FOR aTab IN (SELECT table_name FROM all_tables WHERE owner = 'MY_SCHEMA')
  LOOP
    EXECUTE IMMEDIATE 'GRANT SELECT, INSERT, UPDATE, DELETE, EXECUTE ON ' || aTab || ' TO appuser1';
  END LOOP;
END;
```

You must grant a certain set of permissions in the Oracle database server in order for the exec:

```
dbms_java.grant_permission( 'SCHEMA','SYS:java.util.logging. '
```

User often are asking for a single statement to Grant privileges in a single step. there are multiple workarounds for not have a GRANT SELECT on all table. These tables have execute permission for the schema where the view was created. (Related): oracle - ORA-01031: insufficient privileges when selecting. That way, (READ_USERNAME) can also grant select privilege over the view.
